Claim 5 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim must refer to other claims only in the alternative and cannot depend from other multiple dependent claims. See MPEP § 608.01(n). Accordingly, the claim 5 has not been further treated on the merits.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Ignacio et al. (USP 6,287,518).

Ignacio et al. teach in columns 5-6 lines 49+ use of crystal violet lactone as an indicator for sufficient exposure to sterilants, such as hydrogen peroxide plasma. Crystal violet lactone is the same indicator as used in the application and must inherently has all of the claimed properties.
